SUMMARY

Full-Stack & Mobile Developer with 4+ years building production web and mobile applications with Next.js, React Native, Node.js, and PostgreSQL. Cut server overhead by 50% and reduced API response times by 40% at Nobox Labs through targeted caching and query optimization. Currently building Resumify - a live multi-platform SaaS with AI-powered features across both a Next.js web app and a native Expo mobile client, serving a growing user base.

WORK EXPERIENCE

Fullstack Software Developer

November 2024 - July 2025

Nobox Labs

Remote

- Built and deployed full-stack applications with React, Node.js, and PostgreSQL, optimized caching strategies cut server overhead by 50% under peak load.
- Refactored core API endpoints and database queries, reducing average response times by 40% and significantly improving stability during high-traffic periods.
- Integrated Passport.js with JWT and Google OAuth, cutting authentication-related support tickets by 60% and lifting sign-up completion by 20%.

Junior Frontend Developer

August 2022 - December 2023

Xerax Labs

Remote

- Built and maintained core frontend features using React and TypeScript, strictly optimizing for render performance and usability.
- Migrated legacy frontend components to React, simplifying global state management and significantly improving page responsiveness.
- Engineered a reusable UI component library, accelerating the delivery timeline for new features across the platform.

TECHNICAL SKILLS

Languages | JavaScript, TypeScript, React, React Native, Next.js, Node.js, Express.js, Prisma, PostgreSQL, MongoDB, Redis, Redux, TanStack Query,, Expo / EAS, Docker, Git / GitHub, Tailwind CSS, Shadcn UI, Render

Soft Skills | Agile Development, Product Thinking, Independent Shipping, Code Review, Mentorship

PROJECTS

Resumify

Next.JS, React Native (Expo), PostgreSQL, Flutterwave, Typescript, Gemini AI, Inngest, Paystack

<https://www.getresumify.com>

- Architected and shipped Resumify as a multi-platform SaaS - a Next.js 15 web application and an Expo React Native mobile client sharing a single PostgreSQL backend, serving an active and growing user base.
- Optimized schema design and query structure to improve data retrieval speeds by 35% under peak load; reduced initial page load time by 25% through strategic code splitting and targeted memoization of expensive React components across the resume builder flow.
- Engineered a custom rate-limiting layer over the Gemini AI API, protecting against abuse and preventing cost overruns during high-traffic periods while maintaining consistent service availability.
- Implemented a dual-provider subscription system (Paystack + Flutterwave) with idempotent webhook handlers, automated renewal logic, and transactional email queuing via Inngest to eliminate single-point-of-failure billing bottlenecks.

Study AI

React, NextJS, GeminiAI, MongoDB

<https://studyaii.vercel.app>

- Built an AI-powered study platform with Next.js and Gemini AI that automatically generates summaries and multiple-choice questions from uploaded lecture PDFs.
- Optimized server-side summarization logic with caching, cutting text processing latency by 30% and keeping the experience smooth even with large documents.
- Implemented a prompt-to-draft feature that converts student inputs into structured academic content, reducing content creation time by 50%.

EDUCATION

Bachelor of Science in Mechanical Engineering

Expected December 2029

Federal University Of Technology, Akure

Ondo, Nigeria
